

General exceptions and exemptions from registration

A number of general exceptions may apply to registration with CQC ([read Schedule 2 of the Health and Social Care Act 2008 \(Regulated Activities\) Regulations 2014](#)). These include exceptions that:

- clarify which aspects of a service do not need to be registered separately
- apply to certain types of provider
- apply only in certain circumstances ([see the guidance for each regulated activity](#)).

Where a provider is exempt from the need to register for a specific regulated activity or if an exception under Schedule 2 applies, they should still check if they need to register for any other regulated activities.
